EXPERIENCE

Legalfit

Remote

Front-End Developer

Sep. 2021 – Present

- Single-handedly fixed the buggiest and most important component (Rich Text Editor) of the software product.
- Developed and upgraded in-house software solutions while migrating the platform from old tech stack to new.
- Refined codebase by refactoring code and removing code smells.
- Acted as a go-to person for any front-end related problems and queries for fellow team members.

Tekvortex

Lalitpur, Nepal

Software Engineer

Feb. 2020 – Sep. 2021

- Created database client for non-technical users with Angular and Ruby on Rails.
- Single handedly implemented dependency mapping feature (flagship feature) using D3.js
- Reviewed code and provided feedback to team members.
- Explored solutions for production bugs during hot-fixes.
- Wrote Confluence documentations for various new features.

Associate Software Engineer

Feb. 2019 - Sep. 2020

- Carried out software maintenance for CloudChomp products.
- Developed fixes and introduced new functionalities to the web based products using Ruby on Rails, Angular and PostgreSQL.
- Worked in Agile approach, attending Stand-ups and using JIRA to update tasks.

EDUCATION

Dalhousie University

Halifax, NS

Master of Applied Computer Science

Jan. 2022 – April 2023

Tribhuwan University

Kathmandu, Nepal

Bachelor of Computer Engineering

Nov. 2014 – Aug. 2018

PROJECTS

MEN Auth | Node.js, Express, MongoDB, JWT, Git

Dec. 2020

- Developed a back-end web application using with Node.js serving a REST API.
- Implemented authentication and authorization using JWTs.
- Used the concept of access-token and refresh-token for added security.

React Portfolio | React, Ant Design, HTML, CSS, Git

May 2020

- Developed an open-source portfolio website template using React.js and Ant UI.
- Implemented continuous delivery and deployment using Github Actions and Pages.

Coffee List | Angular, NgRx, RxJs, Bootstrap, HTML, CSS, Git

May 2020

- Leveraged NgRx actions, reducers and selectors for fetching data from Random Data Api and displaying the data in UI.
- Implemented pagination and search features for item list.
- Used OnPush change handler to improve performance.
- Implemented continuous delivery and deployment using Github Actions and Pages.
